

Adobe Digital Publishing Suite - SINGLE EDITION

2 Day Course

Adobe Digital Publishing Suite is a complete solution for individual designers, traditional media publishers, ad agencies, and companies of all sizes that want to create, distribute, monetize, and optimize engaging content and publications for tablet devices. Single Edition provides small to midsize design studios and freelance designers an intuitive and affordable way to deliver iPad apps such as brochures, portfolios, and highly visual books without writing code or relying on developers. Use familiar Adobe InDesign CS5.5 skills to explore your creativity and develop content that inspires and engages.

Who should attend?

This course is for delegates with an existing understanding of Adobe InDesign (an InDesign 2-day Essentials course as a minimum) and Creative Suite image creation. Some HTML/Web experience would also help.

We encourage delegates to bring along their iPad to the training to test their output. The device will require the latest Adobe Content Viewer downloaded from an App Store. Delegate's will also require an Adobe Account which is free and only takes a minute to set-up via the Adobe website.

This is an Adobe Authorised course and comes with official training content from 'Adobe Training Services'. The course runs from 9.30 am to approximately 4.00 pm.

COURSE CONTENT

Introduction

- The future of publishing
- Course objectives
- Overview of the DPS Workflow
- Using Adobe IDs for the DPS
- DPS pricing options
- Bringing the future to the present
- System requirements
- Installing the DPS tools
- DPS resources
