

# Adobe INDESIGN for iPad and ANDROID

## 1 Day Course

Transform print publications for tablet devices. Create interactive content from InDesign 5.5 via the Overlay Creator and Folio Builder tool to deliver engaging reading experiences on an array of mobile devices - including Apple iPad, Android, and BlackBerry PlayBook tablets. This course covers building interactive content up to the point of generating for local delivery to tablet devices or integrating into the Adobe Digital Publishing Suite - a complete solution that lets media and business publishers create, distribute, monetize, and optimize publications for tablet devices.

### Who should attend?

This course is for delegates with an existing understanding of Adobe InDesign (our InDesign 2-day Essentials course as a minimum) and Creative Suite image creation.

We encourage delegates to bring along their iPad and/or Android devices to the training to test their output. The device will require the latest (1.8 or higher) Adobe Content Viewer downloaded from an App Store. Delegate's will also require an Adobe Account which is free and only takes a minute to set-up via the Adobe website.

The course runs from 9.30 am to approximately 4.00 pm. The course content is a general outline only and if required can be varied to meet your specific needs.

## COURSE CONTENT

### Adobe Digital Publishing Suite

- Overview of the DPS system
- Delivery
- Your target audience
- Considerations

### The Adobe Content Viewer

- Overview of the Content Viewer
- How it works on tablet devices
- Working with Acrobat.com
- Share for free with others

### Integrating tools into InDesign

- Downloading and installing
- Signing into new tools

### InDesign Interactivity

- Creating hyperlinks
- Creating buttons
- Creating rollovers
- Placing movies and sounds
- Multi-state objects
- Previewing in-application
